Education Session Set-up & Equipment

All session rooms will be provided with a standard room set that includes:

- Laptop
- Projector
- Screen (sized appropriately for the room)
- 2 wireless mics
- 1 podium mic
- 1 audience mic on a stand
- 1 wireless slide advancer (for the computer provided by AV)

We cannot provide any additional materials or equipment. No exceptions will be made.

Note: there will NOT be a head table in session rooms as in a traditional lay-out. Instead, there will be a cocktail round with three (3) chairs for presenters. This set encourages presenters to be more interactive with each other and the audience.

All other audiovisual needs (including flipcharts, etc.) will be at the presenter's expense. Presenters must arrange and pay for these services with AIHce EXP's exclusive audiovisual provider. To place an order for additional audiovisual, please [download the order form](#).

On-site Logistics

• Presentation Central Uploading

- You are **REQUIRED** to upload electronic copies of your presentation(s) to AIHA's Presentation Management System. You can choose to upload prior to getting on-site (instructions will be sent by AIHA staff in April) or upload in the Speaker Ready Room on-site at the Convention Center. AIHA will provide computers in session rooms, upon which the relevant presentation(s) will already be loaded.
- AIHA recommends PowerPoint (PPT) for all presentations. Adobe Acrobat (PDF) and HTML files may also be used. Please be sure to use the [AIHce 2019 PowerPoint Template](#) when creating your presentation. Our PowerPoint template is set to 16:9 ratio. If you choose to use your own template, please ensure that it is set to this format. Be advised that if you use any other format, it will not fit the screens in our session rooms.
- **NEW - Presenter View**
- New for 2019, AIHA will set the computers in each room to presenter view, which lets you view your presentation and notes on one computer, while the audience views the notes-free presentation on a different monitor. Speakers' notes are shown in large, clear type so that you can use them as a script for your presentation. For more details on this feature, including an image of what this format looks like, please see the [Microsoft Office Support Page](#).
